Course Description:

What is a good life? How do you live one? We start with philosophical answers to these questions, from both Ancient and Modern figures. From there we use findings from economics, anthropology, psychology, and neuroscience to try to understand what makes people happy. As will become clear, we discover that goodness, happiness, and sociality seem to be deeply intertwined in humans. We conclude the class by looking at the evolution of human sociality and morality to understand why this is so.

Required Texts:

All course readings will be made available on the class website.
